

# GROUP PROJECT CONTRACT

## Background

The final presentation and final report will each be graded by assigning a total of 400 points to each assignment (300 points for groups with only three members). Those points will then be divided between the group members as specified in this document. The individual student's grade will then be calculated according to the usual scale (100-90 points is an A, 89-80 points is a B, etc.)

All the group members should divide up responsibilities and also agree on a final division of points. You need not divide equally. For example, one group member might agree to get a smaller share of the final points in exchange for doing less work.

## Contract

We as a group have chosen to write on \_\_\_\_\_.

I, \_\_\_\_\_, agree to do the following work for the final presentation and final project. (*Example: "I will do 50% of the work to prepare the information section of the final project"*)

In exchange for this work, I will receive \_\_\_\_\_% of the points for the final presentation and \_\_\_\_\_% of the points for the final written report.

All group members agree. (Sign below.)
